

Mother-to-be[®]

Maternity Support

CMO

CMO, Incorporated

The original medical grade maternity support. Maximum support for women with strong symptoms, carrying multiples or pre-existing back conditions. Virtually eliminates low back, leg and abdominal pain common during pregnancy. The patented Mother-To-Be[®] is sized according to prepregnancy dress size and will fit throughout the entire term. It is available with or without the P.R.* Heat Moldable Insert. Order with the insert for maximum effectiveness or without for less severe cases.

Relieves Back Pain

Mother-To-Be relieves strain on muscles and ligaments by transferring the weight of the abdomen to the spine where it can be carried naturally. Relief is immediate.

Relieves Abdominal Muscle And Leg Pain

Mother-To-Be lifts and supports the abdomen, reducing pressure at the pelvis and improving circulation in the legs. Pressure on the sciatic nerve, if it occurs, is relieved and sciatica is reduced within minutes.

Stabilizes The Pelvic Ring

The normal softening of ligaments during pregnancy can cause discomfort, often as SI pain. Mother-To-Be gently compresses the pelvic ring, restoring its integrity and reducing pain.

The Abdominal Lift Pad

The large, cushioned Velcro[®] pad is contoured to provide lift with no undesirable abdominal compression. Once the two ends of the support are attached, the weight of the enlarging abdomen is transferred back to the spine. The relief is almost miraculous!
