

The C13TEL Telescoping Post-op

The Ultima Combo Hinge married to the C13TEL.

Our popular ROM hinge with something unique...
A telescoping post-op upright system. Adjustable from 17 to 29 inches in length.

The Vantage strap slider system allows for the adjustment, if needed, of each strap location. These adjustments will permit the avoidance of sensitive areas for the patient.

Patient discomfort from pressure on points such as incisions, ACL hardware or tibial tunnels will be a thing of the past!

The Telescoping Ultima will excel within any knee protocol. Even if you change your protocol, the Ultima can change with you.

The Ultima Combo Hinge Our popular ROM hinge with something unique...
A self-locking full extension system!

The Ultima will excel within any knee protocol. Even if you change your protocol, the Ultima can change with you.
