

#0230 LOVING COMFORT MATERNITY SUPPORT

Designed to reduce pressure on your back, abdomen, stomach, and legs. The Loving Comfort Maternity Brace relieves strain on muscles and ligaments by transferring the weight of the abdomen to the spine where it can be carried naturally.

The Loving Comfort Maternity Brace lifts and supports the abdomen, reducing pressure at the pelvis and improving circulation in the legs. Pressure on the sciatic nerve, if it occurs, is relieved and sciatica is reduced within minutes.

The Loving Comfort Maternity Support is made from lightweight ventilated elastic that is cool and feather soft to the skin. Since the brace doesn't show under your clothing, you can wear your favorite outfits all while being properly supported. It is sized according to pre-pregnancy dress size, fastens quickly with simple Velcro® closures and is designed to grow along with you so you can wear it right through to delivery.
