## Back n Black™ - Low Profile

This lumbar support incorporates the same patented design features of the regular Back-n-Black. This support is ideal for short-statured or female patients as the vertical dimension is 2" shorter than the regular Back-n-Black. In addition, the soft plush lining allows this support to be worn comfortably next to the skin.

## Back n Black™ - Thermo Pocket

This lumbar support features two flexible plastic abdominal panels, an inelastic nylon strapping system, and a posterior pocket that can accommodate a thermoplastic insert. When fitted with the thermoplastic insert, this design offers a superior level of support.
